Stewart Select Angus, LLC (SSA) was established in 1954 with the purchase of an entire herd of 34 cows with calves from H. L. (Hal) Royce of Bedford, Indiana. The availability of the entire herd made the purchase very appealing, and Angus was the breed of choice because of its all-around adaptability and its strength in many economically important traits. Purchasers Arthur C. Stewart and sons, Gilman and John, bought the herd to graze rougher pasture ground on a newly acquired farm three miles Northeast of Greensburg, Indiana and to utilize by-product from the seed business that was founded in 1918. In 1955 SSA joined the American Angus Association (AAA) with the initial membership name of "Stewart and Sons" (campaigning as "Stewart Brothers"), which then changed to "Stewart Seeds Inc." when the business was incorporated in 1976. On September 2, 2005 Stewart Seeds Inc. joined Monsanto and Stewart Seeds Angus became Stewart Select Angus LLC. The present owners of Stewart Select Angus LLC are Tom Stewart (Gilman's son), Jim Stewart (John's son) and Steve Gunn (John's son-in law) along with their sons Nick Stewart (Tom), Andrew Stewart (Jim) and Josh Gunn (Steve).. Since the initial purchase only a few outside females have been added focusing on raising cattle that work in the fescue country of the Midwest.

Stewart Select Angus has a long history in the cattle industry, stemming from founders Gilman and John Stewart's Indiana State Fair Grand Champion Steers in 1934 and 1936. In the spirit of the brothers' commitment to give back to industries in which they are involved, Gilman served on the American Angus Association board, was president in 1978 and awarded the Angus Heritage Foundation Award in 1987. Steve served on the Indiana Beef Cattle board, was president in 1996 and presented the IBCA Lifetime Achievement Award in 2023. Andrew is now at the helm of the operation. He also gives back to the cattle industry on the Indiana Angus Association board and IBCA. Gilman and John Stewart began a legacy that is still alive and well today.

Gilman also was herdsman at Purdue University in 1940 and 1941 and fitted and showed the 1941 International Grand Champion Steer, Loyal Alumnus IV, a Shorthorn-Angus crossbred. Gilman had been deferred from the U.S. military draft to perform these duties before he volunteered for the Air Force where he served for 3½ years. John worked as a student employee at the Purdue beef cattle farm for three years at twenty-five cents per hour. He also wrote his thesis for his B.S. Degree in Animal Husbandry under the direction of Professor Frank King. The thesis was entitled "Average Daily Gain" of the calves in the Purdue purebred beef herds—Angus, Shorthorn and Hereford. Gilman and John's grandfather and great-grandfather, John E. Robbins and J. G. Robbins were both world famous Shorthorn breeders.

In the early days of SSA, herd bulls were purchased to use in natural service. Barry Bandler of Kintyre sired the first calf crop, followed by Eileenmere R G 10 and Bardoliermere P S 3, a sire bred by Herman Purdy of Penn State University. Purdy, a cattleman and educator known worldwide, advised on several other herd bull purchases that included Mole's Hill Maximillian 1227 from Mole's Hill Farm in Connecticut, Eileenmere E F 4928 3 from Eisenhower Farm in Pennsylvania, Micmac Heckettier 99 from the Heckett Herd in Pennsylvania and Uncas Colossal 15 from Western Canada. Sir Big William 2021 was the last major herd sire that was purchased (1972). New A.I. rules shifted the trend from purchasing herd sires to utilizing semen from the nation's top bulls for genetic improvements and using SSA bulls for natural service. Non-owned bulls used heavily through artificial insemination were P S Power Play, Pine Drive Big Sky, Paramount Ambush, N Bar Emulation EXT, R R Traveler 5204, G A R Expectation 4915, Bon View New Design 878, G A R Retail Product, C R A Bextor 872 5205 608, Connealy Comrade 1385, Hoover Dam, S S Niagara Z29, Plattermere Weigh Up K360, S S Brickyard, Connealy Mainstay, Yon Top Cut G730, G A R Home Town and S S Crossroad. In addition to the dominant family of Eventress females in the herd other family names include: Ann, Blackcap, Madame Pride, Elba, Elluna, Jet, Juantalite, Karama, Lady Algoma, Lucy, Mignone, Miss Countess, Miss Traveler, Perola Pride, and Ruth.

In the 1960's the best way of evaluating cattle against other herds and promoting your own was the show ring. Soon after entering the Angus business Stewarts showed cattle at the Indiana State Fair, and from 1955

through 1998 the show string was a presence in the Northeast corner of the cattle barn. They also exhibited cattle at many other shows over the years including the Ohio and Kentucky State Fairs, the All-American Futurity, the Toronto Canada Royal Winter Fair, the National Western Stock Show (NWSS) and the North American International Livestock Exposition (NAILE). A few highlights include: Reserve Grand Champion Female at the 1975 Indiana, Ohio and Kentucky State Fairs with H F Blackbird 99 and Reserve Grand Champion Bull at the 1984 NAILE with S S Rising Sun 64R. A heifer, Blackbird S S 1182, was sold to Brost and Wilson of Indiana and became Reserve Grand Champion at the NAILE. In addition, Tom Stewart showed the Grand Champion Steer, an Angus, at the 1963 ISF and the Reserve Grand in 1969. As part of the Purdue performance program SSA participated in Gold Medal Shows at county, regional and the state levels. In recent years there has been a limited amount of showing mainly at local shows.

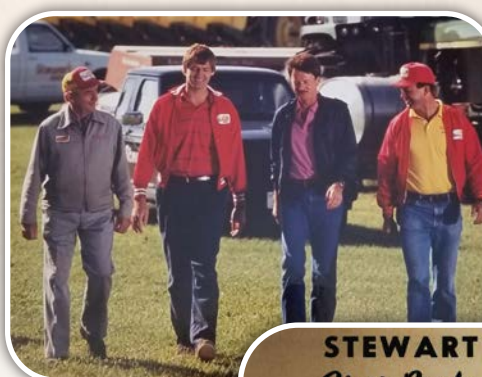

The original intent of building an outstanding cow herd has led from cattle evaluation in the show ring to performance testing (weights and in herd ratios) to genetic predictions of Expected Progeny Differences (EPDs) and \$Value indexes enhanced by genetic testing. The SSA herd maintains balanced-trait selection, for low to moderate birth weight, excellent growth and above average milk and carcass quality. Performance testing began in 1962 with the recording of weaning weights in Purdue University's performance testing program; then that data was converted to Angus Herd Improvement Records in 1973. The current computerized information system that began in 1986 contains nearly 10,000 animals. The Angus Information Management Software (AIMS) is utilized for data management of such things as registrations, AHIR and breeding with all information available to assist in sales and selection. Ultrasound evaluation for carcass merit was added in 1995 to aid in selection and enhance the value of our seedstock. The Indiana Beef Evaluation Program (IBEP) Bull Test and the Midland Bull Test help in the promotion, evaluation and sale of yearling bulls. We have consistently had success at both tests winning multiple times for ADG, Get-of-Sire, High Efficiency and Carcass Merit Bull.

Merchandising has focused toward the production of bulls for progressive cattlemen, both purebred and commercial, with 70 bulls being sold annually. Since 2016 we have hosted an in person bull sale with online bidding available. We keep a few younger bulls back along with a handful of others to sell privately off the farm. Freeze branding of the "Sun SS" brand on the right hip began in 1996 to act as a billboard for Stewart Select Angus along rural highways.

The Stewart Select Angus herd follows a strict health program as it has long been certified and accredited free of brucellosis and tuberculosis and since 1999 when testing was added, the herd has proven negative for Johnes' disease. Respiratory, reproductive and clostridial vaccinations are also routinely given to all animals. All eligible bulls are examined for breeding soundness prior to being sold. Embryo transfer was utilized from 1977 to the mid-90s, was discontinued because management believed that every female in the herd could produce a bull for the sale group, but resumed in 2014 to have more progeny from our top producing cows. We have been some heavy users of IVF to keep cows calving in the 365 day window.

Steve Gunn has managed a cattle feeding enterprise since his graduation from Purdue University in 1974. Lower-end calves from the purebred herd plus purchased feeder steers have been sold as freezer beef to local customers wanting that Farm Gate to Table experience. Some calves sired by SSA bulls have also been obtained for this endeavor.

The Stewart Select Angus herd now calves out just under 200 cows and keeps a majority of the heifers as replacements. Herd development followed advice handed down from Arthur such as "Don't follow fad or fancy" and "Don't take paper for money." The herd is a balanced-trait herd that is strong in economically important traits such as birth, maternal, growth and carcass. SSA is committed to producing genetically sound Angus seedstock that will work for purebred and commercial cattlemen alike, and it is their desire to enhance the enjoyment of beef eaters around the world.

WELCOME TO THE 2026 CROSSROADS COLLABORATION ANGUS SALE

KB Angus is located in northern lower Michigan. Our focus is to produce elite angus breeding bulls and females for our customers. We are offering an outstanding set of bred and open heifers. These are the best females we've ever produced.

I grew up on a dairy farm as a kid and in 1991, I started Advanced Industries, Inc. Specializing in ultra precision machining, making components for aerospace, medical, electronics and automotive industries. I started raising angus cattle (KB Angus) as a hobby in 2005 and it has grown to what it is today. Being in the machining business, precision and perfection is a must in everything you do. The dedication to perfection has carried over into KB Angus where we strive to breed the very best cattle possible. You will find this offering to be elite in their genetics, phenotype and structure.

I would like to extend my sincere thanks to the Stewart family for holding this event and allowing us to be a part of it. We look forward to seeing everyone on sale day!

If you have any questions or need assistance, please give me a call.

Thank you,
Kevin

Dear Fellow Angus Breeder,

Thirteen years ago, when we were married, we unloaded our first five head of Angus cattle outside Economy, Indiana, and began building a dream from the ground up.

What started as a small herd has grown into Sankey Angus, a family operation committed to producing Angus cattle with Quality From Every Angle.

The meaning behind that phrase goes much deeper than we initially realized.

We came across an old Sankey Ranch sign that dated back to the early years after Chris and Sharee were married in 1978 and returned home to the family ranch. At that time, the Sankeys raised Angus, Simmentals, and horses. The sign simply stated:

“Quality From Every Angle.”

We are certain that purpose statement was coined by the Sankey legend and ranch founder, HF Sankey - Chris’ grandfather. We took a picture of that old sign, and something about it stuck with us. The more we thought about it, the more we realized that those words still ring true for our operation today, more than 40 years later.

We strive to raise cattle that have Quality From Every Angle. To us, that means more than eye appeal. We believe cattle must first and foremost possess high-quality phenotype: the kind of cattle that stand out in the pasture. But we also understand that in today’s beef industry, phenotype must be backed by genetic information that makes cattle relevant and profitable.

Finally, we still believe in the value of a proven, three-generation pedigree. We believe those three pieces - phenotype, genotype, and pedigree - are equally important. There is no reason to sacrifice one for the sake of another.

When we bring all three together, we believe we find the recipe for success: creating Angus cattle that have Quality From Every Angle.

That philosophy guides every decision we make. We work to balance maternal strength, structural soundness, performance, carcass merit, and longevity to create cattle that add value for both commercial and registered operations.

It also means building a program grounded in family values. Our children work alongside us every day, learning the importance of hard work, integrity, and stewardship. As a family, we take pride in being involved in every aspect of the operation, from breeding decisions to daily herd management.

Today, we are proud to offer cattle that represent the progress we have made over the past 13 years while remaining true to the principles that have guided the Sankey family for generations. We believe the best way to appreciate our program is to experience it firsthand.

Whether you are looking to strengthen maternal traits, add performance, improve carcass quality, or build a more uniform and functional herd, we would welcome the opportunity to visit with you about your goals.

Thank you for your interest in Sankey Angus. We are grateful for the relationships and partnerships that have helped us grow, and we look forward to the opportunity to earn your business and serve your operation.

Sincerely,
Cody, Lindsay, Caroline & Cyrus Sankey

- From the heart of the Stewart Select Angus program is this exceptional daughter of Veracious produced from Mignonne S S F137, who sold one-half interest as the lead-off Lot 1 female in the fall of 2025 to Scioto Valley Angus in Ohio.
- This elite female is a maternal sister to the \$170,000 selection of Riverbend Ranches through the Fall 2025 EXAR sale, Mignonne S S J139. In addition, J139 sold as the top-selling female of a past Crossroads Collaboration sale and served as a past donor in the Boyd and EXAR programs.
- F137 blends the proven Pathfinder genetics of Weigh Up with the Pathfinder Dam Mignonne S S B117, and excelled among her contemporaries in the Stewart program posting a weaning ratio of 114 along with YR-114, %IMF-105 and UREA-108, and now has a progeny record excelling for low birth with BR 6@92 combined with YR 6@100, %IMF 6@101 and UREA 6@101.
- Front-end genetics from one of the most trusted and proven cow families in the Stewart Select program.

MIGNONNE S S J139 - The \$170,000 maternal sister to Lot 1.

- One of the most exciting young females ever produced in the history of the Sankey program is this daughter of the heavily-used Alta Genetics sire KCF Bennett Culmination, produced from a direct daughter of the \$50,000 GENEX sire E&B Wildcat 9402.
- Among all Culmination daughters in the entire Angus breed, she is the only female among her contemporaries with her combination of breed-impacting \$M and \$C values; plus, she offers exceptional foot quality, elite carcass traits, and an excellent spread from CED to yearling growth.
- She is backed by one of the highest income-producing cow families in the Sankey program, who year after year have produced some of the very best for Sankey Angus.
- An elite young donor prospect with a genomic profile that ranks her in a league of her own.

SANKEY RUTH 504 - Lot 3

- This daughter of the rare curve-bending, end-product sire, Baldridge Heat Seeker, posted a low birth ratio of 86 combined WR-101 in the Sankey program.
- Her dam by the \$500,000 Connealy Craftsman is a member of one of the most successful and most popular flushes in the history of the Sankey program and is a direct daughter of the high-income-producing donor Sankey Ruth 934, who has produced several sale features for the Sankey program.
- **Due to calve 1/01/27 to POSS LONGBOW.**

SANKEY RUTH 934 - The maternal grandam of Lot 3.

THE RUTH FAMILY

- Proven low-birth genetics stacked in the pedigree of this daughter of the GENEX sire Hoffman Bar None, who posted a very low birth ratio of 75 and is backed by an Iconic dam, recording BR 2@87.
- Her dam is a direct daughter of the high-income-producing Sankey Ruth 934, who sold to the Lisonbee and Betts programs. In addition, Sankey Ruth 934 is a full sister to the \$70,000 Hoffman Midwest and a maternal sister to the \$32,000 Sankey Ruth 1002.
- **Due to calve 1/16/27 to SCHIEFELBEIN CONTINENTAL.**

SANKEY RUTH 502 - Lot 4B

- This daughter of the proven GENEX sire Hoffman Bar None posted a weaning ratio of 101 in the Sankey program.
- Her dam, who records BR 2@97 and WR 2@100, is a full sister to the Lisonbee and Betts donor Sankey Ruth 934, and she's also a full sister to the \$70,000 Hoffman Midwest.
- **Due to calve 1/01/27 to SCHIEFELBEIN CONTINENTAL.**

RUTH S S D180 - Several of her descendants sell.

KB-RUTH OF 3048 N47 - Lot 5

- **SELLING ONE-HALF INTEREST WITH THE OPTION TO DOUBLE THE BID PRICE TO ACQUIRE FULL INTEREST. IF FULL INTEREST IS ACQUIRED, KB ANGUS RETAINS EIGHT FUTURE EMBRYOS.**
- Without question, one of the most unique females in the entire breed and one of the very best ever offered from the KB program is this daughter of the rare ST Genetics sire Baldridge Heat Seeker H925, backed by the great Ruth cow family developed for many generations in the Stewart program.
- She separates herself into a league of her own when compared to all of her contemporaries in the Angus breed with her ability to offer low birth with breed-leading growth, super foot quality, elite end-product traits, and a set of \$Indexes that rank at the top of the breed for both \$M and \$C values.
- She's produced from a two-year-old dam and her maternal grandam, Sankey Ruth 928, is a maternal sister to the \$70,000 Hoffman Midwest, the \$32,000 Sankey Ruth 1002, and Sankey Ruth 934, who has been very influential in her ability to produce sale highlights year after year in the Crossroads Collaboration sales.
- Unsurpassed genetic merit in this exciting female that will accelerate any program forward with the EPD package she has to offer.

- One of the most intriguing daughters of the heavily-used ST Genetics sire Connealy Commerce to sell is this impressive spring-born heifer calf who blends a tremendous set of EPDs with the look of a female to make a super replacement in any program looking to combine phenotype and genomics all in one package.
- She has a double-digit CED and curve-bending growth with a top-tier \$M ranking, all of which are complemented with an extremely low PAP EPD.
- Her dam by the heavily-used AI sire Congress, descends from the Blackbird cow family that has worked very well in the Marda program, and she has weaned two calves with an average nursing ratio of 105.
- Proven genetics stacked for multiple generations.

CONNEALY COMMERCE - The heavily-used sire of Lot 12.

• Due to calve 12/4/26 to ELLINGSON LAKOTA.

- An outstanding trio of females selling as Lots 13, 13A and 13B.
- Perola Pride S S H63 has served as a donor in the Stewart Select program excelling for low birth and calving ease as she posted a birth ratio of 90 and has five calves currently reported with an average low birth ratio of 95 and her first daughter in production weaned her first calf with a ratio of 103.
- Cattlemen will appreciate the flawless phenotype that this big-ribbed, deep-bodied, ultra-complete Warrior daughter has to offer.
- The two flush sisters selling as Lots 13A and 13B are sired by the \$245,000 heavily used ST Genetics sire, Poss Winchester, and both of these females offer almost identical EPD profiles, much like their mother, excelling for calving ease and low birth while incorporating extra growth and marbling, ultimately excelling with top-tier \$C values in their indexes.

- Due to calve 12/27/26 to HOFFMAN HEISMAN.
- Two outstanding bred heifers in these two maternal sisters to the heavily used ST Genetics sire, Myers Fair-N-Square M39.
- They are produced from the long-time Myers Angus donor, Myers Miss Beauty M136, who sold through a past Family Values sale to the Stellpflug program in Wyoming.
- Lot 14A is sired by the heavily used Select Sires high maternal sire, Baldridge Gibson, and offers a pedigree that is flawless in terms of ability to transmit maternal power highlighted with a top ranking for \$M value.
- Lot 14B excels for extreme calving ease and low birth and also offers a pedigree rich in maternal excellence as she is sired by the proven ABS sire, Surpass, and backed by one of the breed's all-time great daughters of the Pathfinder sire, Connealy Thunder, and she too excels in her \$M ranking.

- Two top-notch bred heifers from the heart of the KB program in these two flush sisters sired by the highly-proven SG Salvation, and backed by the high-maternal Butter Fly cow family that has produced numerous sale features for past Boyd and Myers production sales.
- Her dam is by the record-selling Pathfinder Sire Baldridge Colonel, and her maternal grandam, Boyd/Myers Butter Fly M255, was selected through the Solid Rock dispersal. In addition, M255 is a maternal sister to Butterfly 8207 who served as a past donor for KB Angus, and she's also a maternal sister to Thomas Butterfly 4742 who was a second generation donor for the Boyd/Myers programs.
- The dam of these heifers has earned her Pathfinder ranking in the breed, as she has weaned six calves with an average nursing ratio of 106 proving the maternal power in this Butter Fly cow family.

KB-BLUE LADY of J81 N28 - Lot 20

- This daughter of the ST Genetics sire E&B Everett is truly one of the most unique breeding pieces to sell this fall with her combination of breed-leading \$M and \$C values. In fact, she is the only daughter of Everett in the entire breed with her combination of Heifer Pregnancy in the top 1% as well as \$M and \$C values both in the elite 1% of the entire breed.
- Her dam is a direct daughter of the \$475,000 breed leader, GAR Home Town.

E&B EVERETT - A super daughter sells as Lot 20.

- An impressive young four-year old daughter of the \$50,000 highly-proven GENEX sire E&B Wildcat 9402 in this female who weaned her first calf with a ratio of 103.
- Her dam, who is bred in the GAR program, is one of the breed's top daughters of Ashland and has a progeny record of BR 1@92, WR 1@113 and YR 1@109, and excels in her ability to transmit maternal power as her six daughters currently in production have combined for WR 11@103.
- A maternal sister to Sankey Rita 245 is Sankey Rita 247, who sold through the 2024 Crossroads Collaboration sale to Circle F Farms and then sold through a Circle F production sale to Express Angus Ranch where she will sell as a feature in the EXAR dispersal.
- An exciting heifer calf sells alongside as Lot 21A sired by the \$80,000 Poss Remington, and she offers a set of genetics that should excel for a multitude of traits.

SANKEY RITA 247 - This maternal sister to Lot 21 is a highlight in the EXAR Dispersal.

- This impressive, high maternal three-year-old is a maternal sister to Hoffman Stagecoach 1908, who is the sire of the \$300,000 Stellopflug Hoffman RiseAbove.
- Her Pathfinder Dam, who records BR 6@96, WR 6@105 and YR 4@106, sold as the \$10,000 top-selling cow of the 2023 Crossroads Collaboration sale.
- **Due to calve 3/19/27 to BASIN CHIEF.**

Basin Chief

- **FOR REFERENCE ONLY; OWNED BY SANKEY ANGUS AND DEER VALLEY FARM**
- Basin Chief is a son of the \$600,000 Basin Jameson 1076 backed by the high-income-producing Basin Lucy cow family and serves as a senior herd sire in the Sankey and DVF programs.
- He offers breed-leading growth while maintaining low birth weight and calving ease, excels for hair shedding, and ranks high in the breed for his combination of \$M and \$C traits. In the Basin program, he posted an individual weaning ratio of 117 and a yearling ratio of 114 combined with %IMF-118 and UREA-109.
- Many of the Sankey females are carrying his service.

BSG COUNTESS 1705 OF 028 - The \$10,000 dam of Lot 56.
